

Hello!

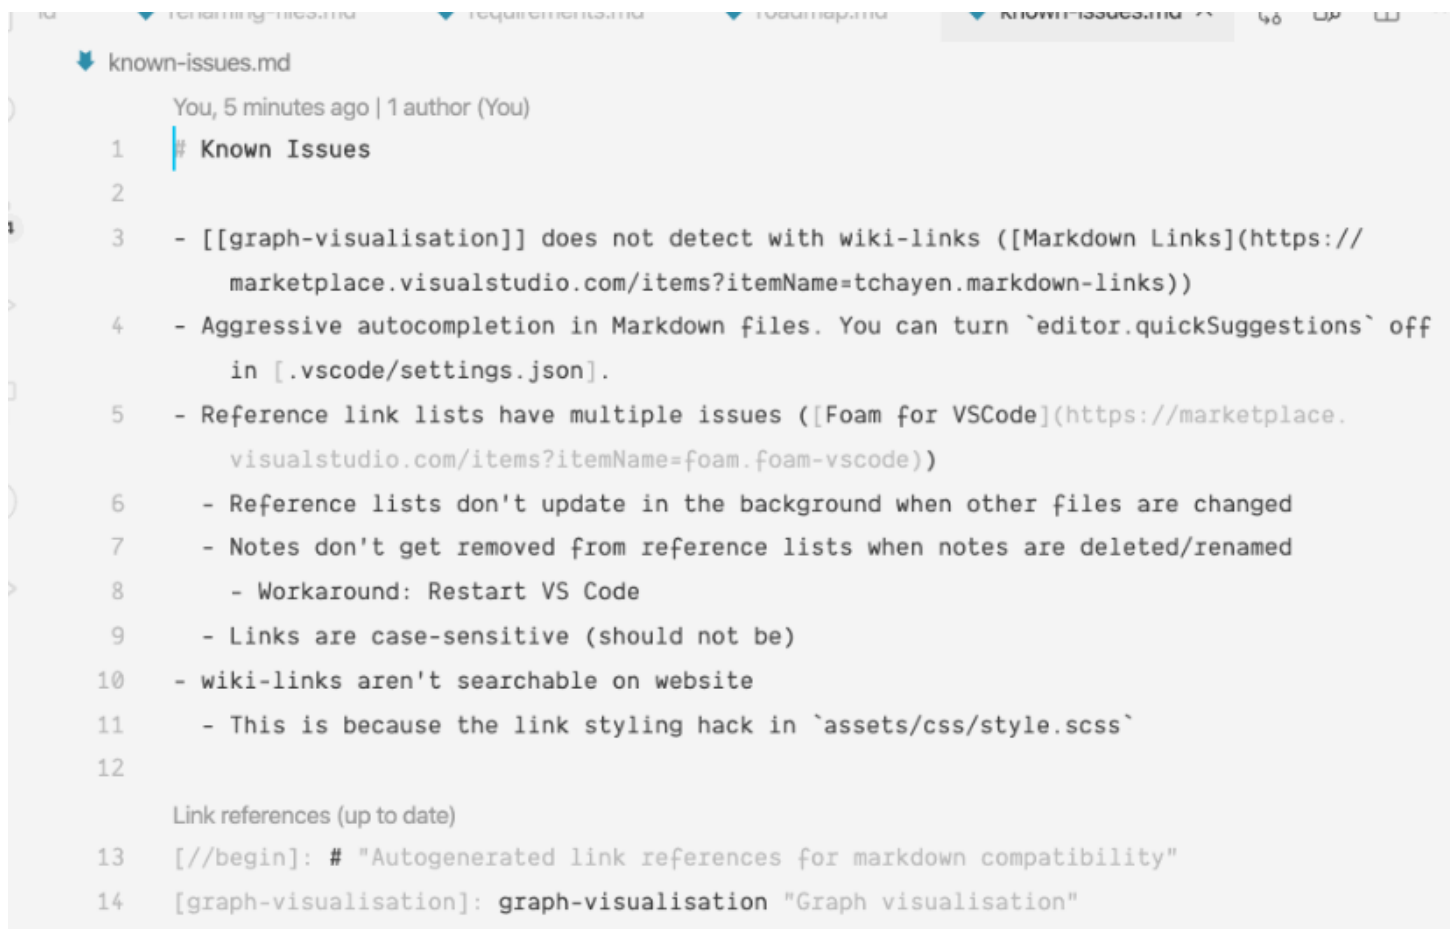

another test

This is an [example backlink](#) for GitHub

This is a [normal link](#)

This is [another](#) test

Just testing image:

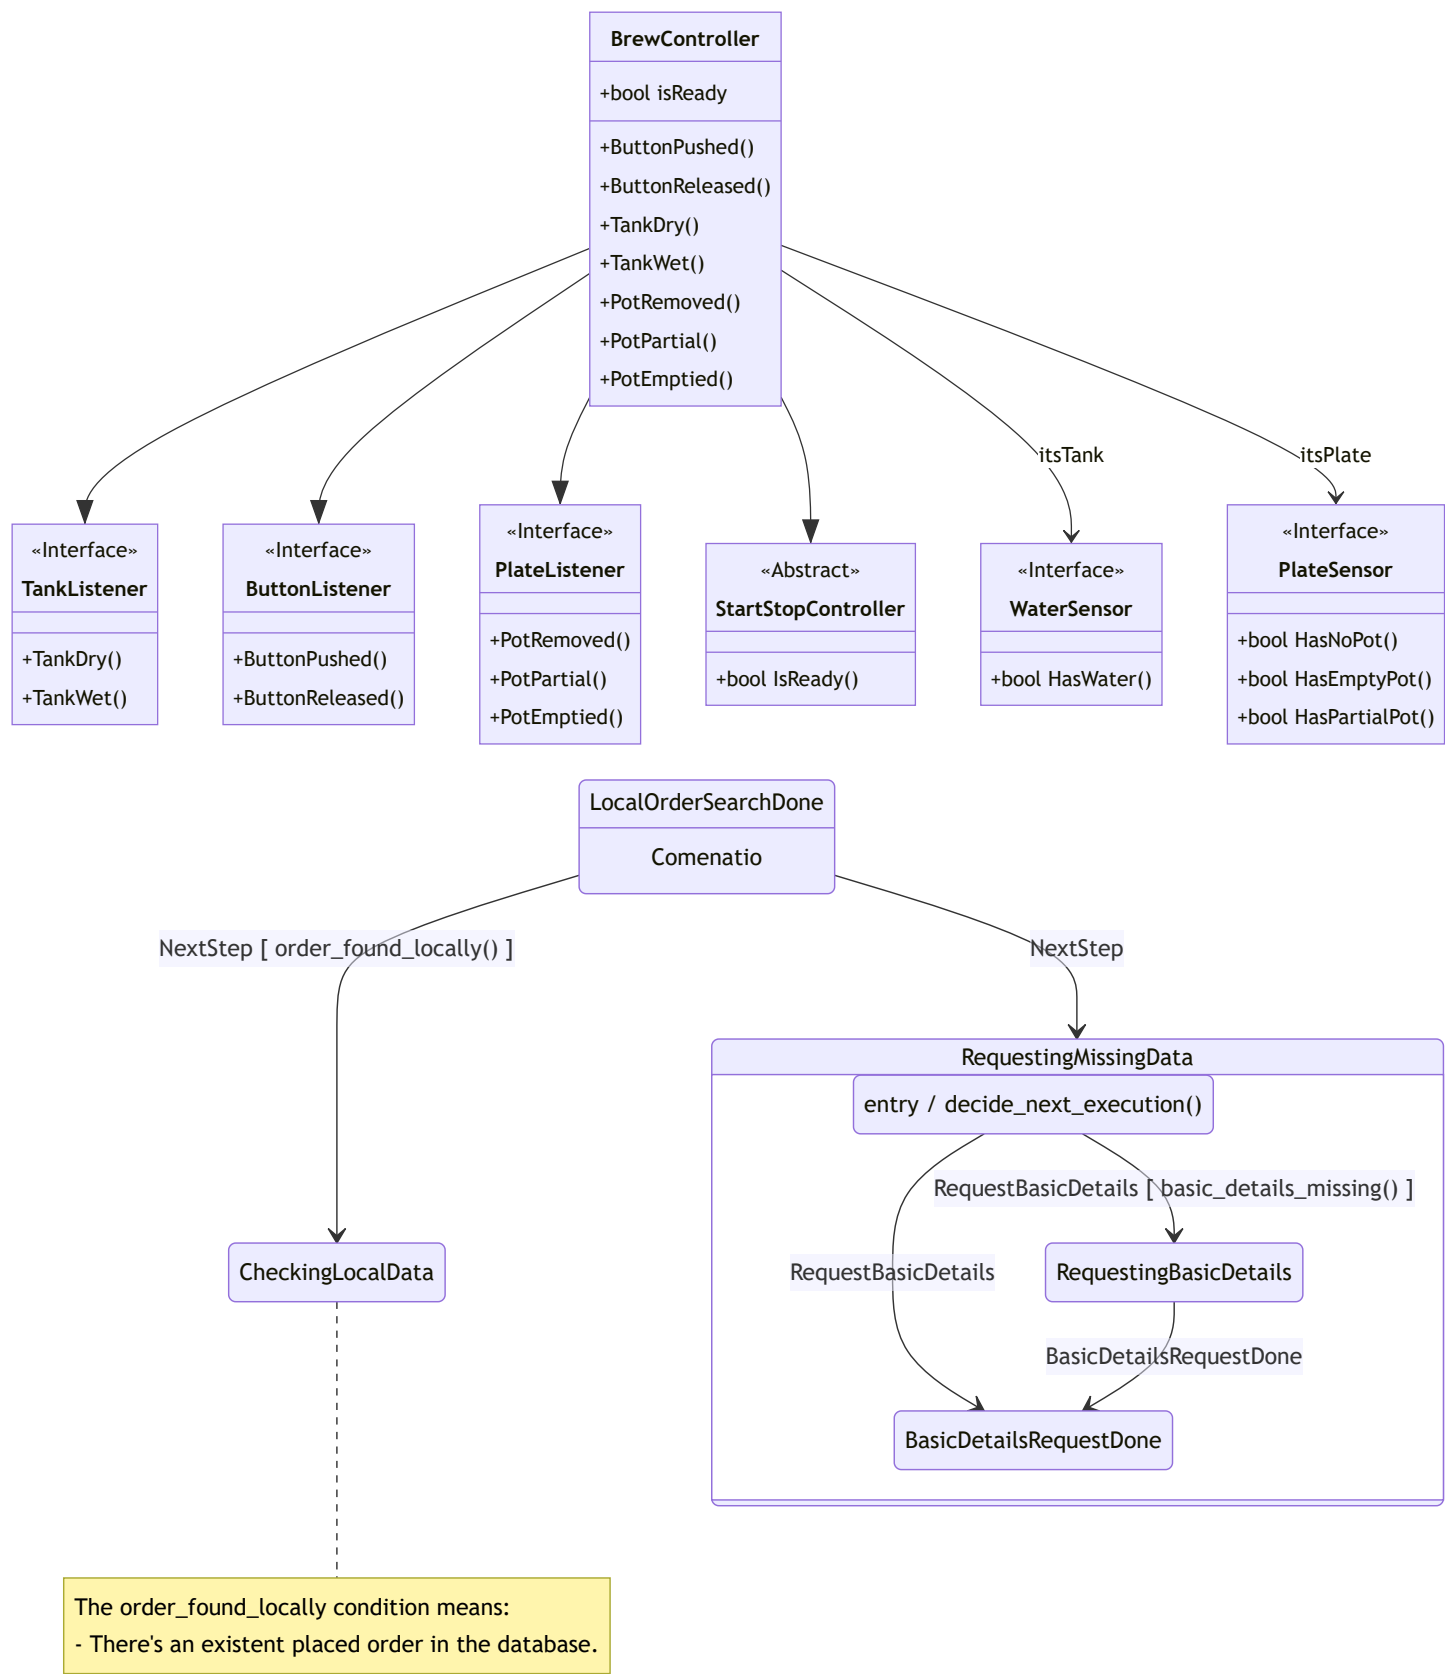

```
known-issues.md
You, 5 minutes ago | 1 author (You)
1 # Known Issues
2
3 - [[graph-visualisation]] does not detect with wiki-links ([Markdown Links](https://
  marketplace.visualstudio.com/items?itemName=tchayen.markdown-links))
4 - Aggressive autocompletion in Markdown files. You can turn `editor.quickSuggestions` off
  in [.vscode/settings.json].
5 - Reference link lists have multiple issues ([Foam for VSCode](https://marketplace.
  visualstudio.com/items?itemName=foam.foam-vscode))
6 - Reference lists don't update in the background when other files are changed
7 - Notes don't get removed from reference lists when notes are deleted/renamed
8   - Workaround: Restart VS Code
9   - Links are case-sensitive (should not be)
10 - wiki-links aren't searchable on website
11   - This is because the link styling hack in `assets/css/style.scss`
12
13 Link references (up to date)
14 [//begin]: # "Autogenerated link references for markdown compatibility"
15 [graph-visualisation]: graph-visualisation "Graph visualisation"
```

What about footnotes? ^[1]

test

$$\int_{\square} \int_{\square} f(x, y) dx dy$$

[example backlink]: "example backlink"

[another]: another "another"

[/end]: # "Autogenerated link references"

1. What about it? ↩
